

GROWMAX ENGINEERS aims to provide reliable electrical contracting and solar energy solutions with focusing on efficiency and sustainability. Our goal is to drive innovation in power distribution and renewable energy for a greener future.

1. DISCOM Empanelled Vendor/Solar EPC

As per MNRE OM 318/6/2022-GCRT. MNRE, Govt. of India

An MSEDCL-empanelled vendor listed on the National Portal (PM Surya Ghar – MBY), under the Ministry of New and Renewable Energy, Govt. of India. Authorized to execute residential grid-connected solar projects in Maharashtra, under the subsidy scheme.

2. Govt. Licensed Electrical Contractor

Industries, Energy, Labour and Mining Department, Govt. of Maharashtra

We are authorized to work on distribution networks including LT, 11kV, and 33kV lines, distribution transformers, and substations, after obtaining necessary sanctions and approvals from the utility and competent authorities.

NEW THINKING NEW FEASIBILITIES

INTRODUCTION

Overview:

Founded in 2017 and formerly known as SF Infratech Electrical Company, GROWMAX ENGINEERS was officially registered under its current name in 2023. It is a professionally managed Solar EPC, Electrical Contracting, and Consulting firm established by **SHAHEZAD AHMED SHAKEEL AHMED**, a graduate in Electrical Engineering (B.E).

Head Office in Malegaon-423203, Maharashtra, the company is a registered with the following credentials:

Goods and Services Tax, Government of India, States and Union Territories
GSTIN: 27IVDPS4432J1Z4

INDUSTRIES, ENERGY, LABOUR AND MINING DEPARTMENT, GOVERNMENT OF MAHARASHTRA
having Electrical Contractor License & also
Supervisor License

Listed on National Portal under Ministry of New and Renewable Energy, Govt. of India.

NEW THINKING NEW FEASIBILITIES

VISION

To become the leading company in electrical contracting and solar EPC services—where anyone seeking reliable electrical solutions thinks first of GROWMAX ENGINEERS. We strive to be known for quality, trust, and a service-first approach that powers progress for homes, businesses, and communities.

MISSION

To provide easy, reliable, and affordable solutions for all types of electrical and solar energy needs. At GROWMAX ENGINEERS, we help consumers move away from costly energy bills by switching to solar power, and we offer support for everything from major infrastructure projects to the smallest electrical problems. Our goal is to reduce technical challenges, raise awareness, and ensure every customer receives clear guidance and complete solutions with honesty and care.

Founder and Director

SHAHEZAD AHMED SHAKEEL AHMED

B. E. (ELECTRICAL), D. E. E.

Meet the visionary behind GROWMAX ENGINEERS, Shahezad Ahmed S/o Shakeel Ahmed, our esteemed founder and proprietor. A graduate in Electrical Engineering (B.E. Pune University), after doing Diploma in same stream. Shahezad brings a strong combination of academic knowledge and hands-on field experience, known for his disciplined work ethic, technical clarity, and leadership. He has built his career through years of involvement in electrical infrastructure projects—ranging from substation operations and line erection to transformer systems and utility coordination. With a calm personality, deep understanding of ground realities, project execution, and regulatory processes have been key in shaping GROWMAX ENGINEERS into a trusted name in the electrical contracting industry. Under his guidance, the company stands for reliability, precision, and a commitment to service excellence.

Experience

From 2020 to 2023, he worked with Hindustan Engineering Corporation, a vendor of Malegaon Power Supply Limited, where he got extensive experience in power distribution systems, substation operations, and utility coordination.

Between 2018 and 2020, he served as an Engineer at Pravin Electrical Pvt. Ltd., contractor for Samsung C&T (India) Pvt. Ltd., contributing to the prestigious DAICEC project for Reliance Industries Limited in BKC, Mumbai.

His professional journey began with Target Engineers (2017–2018) as a Supervisor, and during this time I also established SF Infratech, now known as GROWMAX ENGINEERS, where he progressively led and executed electrical infrastructure projects under his own banner.

CORE SERVICES

1. Distribution Contracts & Infrastructure Works
2. Grid-Connected Solar Projects
3. Industrial & Commercial Electrical Installations
4. Electrical Maintenance & Service Packages
5. Site Survey & Electrical Consultation

1. Distribution Contracts & Infrastructure

Works

This core service covers comprehensive contracting solutions for power distribution infrastructure, executed with full regulatory compliance and technical precision.

Scope of Services:

Turnkey Execution of Electrical Infrastructure

- ▶ 33/11kV Substations (GSS)
- ▶ 33kV, 11kV Overhead Line Erection
- ▶ Distribution Transformer (DTC) Installation (25 kVA to 1000 kVA)
- ▶ LT Line and Pole Infrastructure Development

Relocation, Shifting & Dismantling

- ▶ 33kV and 11kV Overhead Lines
- ▶ DTC Shifting and Pole Realignment
- ▶ Conversion of Bare Conductors to AB Cable / Insulated Conductors
- ▶ LT Line Reconfiguration and Network Optimization

Commissioning & Liaisoning

- ▶ Customer support in approval, sanction, and commissioning of substations and distribution lines
- ▶ Service connection documentation & coordination with DISCOMs and competent authorities
- ▶ Preparation of technical drawings, SLDs, and compliance documentation

Supervision & Monitoring Services

- ▶ Supervision of erection and maintenance of DTCs, HT/LT lines, cubicle meters, and switchgear
- ▶ Quality checks, contractor coordination, and safety assurance
- ▶ Underground cabling supervision for urban electrical infrastructure

Additional Capabilities

- ▶ Load analysis and network balancing solutions
- ▶ Emergency restoration and transformer replacement services
- ▶ Installation of capacitor banks and power factor correction equipment

2. Grid-Connected Solar Projects

We provide end-to-end EPC (Engineering, Procurement, and Construction) services for grid-connected solar systems, helping clients reduce energy costs and adopt clean, renewable power.

Scope of Services:

Residential Rooftop Projects (With Govt. Subsidy)

We install grid-connected rooftop solar systems under the PM Surya Ghar – Muft Bijli Yojana (PMSG-MBY), handling everything from design and documentation to net metering and installation. As an MNRE-approved agency, we ensure smooth execution along with a 5-year comprehensive service warranty for worry-free ownership.

Residential, Commercial, and Industrial Projects (Non-Subsidize)

For consumers outside subsidy coverage, we offer tailored grid-connected solar systems for homes, offices, commercial entrepreneurs and industries. Systems are designed for optimum performance and come with a 5-year service warranty, ensuring continued support and maintenance.

Megawatt-Scale Solar Projects

We undertake large-scale solar EPC projects for industrial clients, solar parks, or captive use. From DPR and clearances to installation and synchronization, we manage the full scope with regulatory compliance and technical accuracy.

Operation & Maintenance (O&M)

We offer professional solar O&M services including scheduled cleaning, performance checks, fault repair, and inverter monitoring. We also undertake sprinkler system installation for solar panel cleaning, helping clients maintain system efficiency with minimal effort. AMCs are available for both new and existing systems.

3. Industrial & Commercial Electrical Installations

This service covers all types of structured electrical wiring and installations across residential, commercial, and industrial properties, with full compliance to safety and electrical standards.

Scope of Services:

Residential Electrical Installations

- ▶ Complete internal and external wiring for homes, apartments and bungalows
- ▶ DB (Distribution Board) setup with circuit protection
- ▶ Earthing and lightning protection systems
- ▶ Installation of meter box, load balancing, and safety checks

Commercial Electrical Installations

- ▶ Wiring for offices, shops, complex and institutions with proper load distribution
- ▶ Setup of MCBs, ELCBs, and protection devices
- ▶ Cable management for lighting, ACs, and office equipment
- ▶ Installation of panel boards, sockets, and power points

Industrial Electrical Installations

- ▶ Three-phase supply and wiring for industrial units
- ▶ Installation of LT panels, MCC panels, and APFC (Automatic Power Factor Control)
- ▶ Heavy load distribution and grounding systems
- ▶ Compliance with industrial electrical safety and inspection standards

4. Electrical Maintenance & Service Packages

Our service packages are designed for hassle-free annual support. Customers can register under affordable yearly plans and receive professional service visits as per their package—services are included, but materials or new installation work are charged separately.

Scope of Services:

Domestic Service Packages

These packages cover routine electrical issues in homes, such as fan capacitor changes, switch/socket replacement, wiring burnouts, tripping issues, and minor repairs. Regular visits are scheduled based on the chosen package to ensure quick and reliable support without repeated booking hassles.

Industrial Service Packages

Ideal for power looms and small factories, these packages offer priority service during breakdowns and small faults that can cause production shutdowns. With a registered package, units receive fast response and expert on-site support to minimize downtime.

Maintenance Contracts and Visits

We offer one-time, lump-sum maintenance contracts for residential societies, commercial properties, and industrial setups. These contracts cover on-demand technical visits, fault diagnosis, and repair services based on predefined coverage. Clients benefit from quick support without the need for repeated bookings, all under a single agreement.

Solar Panel Cleaning Packages

We provide flexible solar panel cleaning packages based on the number of visits and duration selected by the customer. Packages are designed to maintain system performance, with each visit scheduled as per the chosen plan. Only service is included—cleaning tools and additional repairs, if any, are charged separately.

5. Site Survey & Electrical Consultation

We offer paid, expert-level survey and consultation services to help residential, commercial, and industrial clients make informed, compliant, and technically sound decisions. Whether it's understanding billing issues, planning load distribution, addressing electrical faults, or exploring solar feasibility, our guidance ensures safety, efficiency, and legal clarity in every situation.

Scope of Services:

Site Inspection & Survey

We conduct on-site inspections to assess the suitability of existing or proposed electrical infrastructure for our industrial clients. This includes load analysis, distribution planning, protection system recommendations, system designing, and electrical mapping. Surveys also cover rooftop feasibility (for solar), and overall assessments for connections, upgrades, or modifications.

Technical Consulting & Legal Awareness Support

Many consumers face penalties, excess charges, or confusion due to a lack of technical or regulatory awareness. We help determine whether the issue is genuine or simply a misunderstanding. Our team conducts site surveys, gathers technical observations, and analyzes meter readings, load details, and billing records to offer accurate, case-specific guidance. We also educate consumers about their rights, responsibilities, and available legal options to help them find a fair and informed resolution.

Electrical Safety & Tariff Compliance Advisory

We provide expert guidance on voltage drops, earthing issues, transient tripping, and general system safety. Consumers are also advised on avoiding penalties due to overloading, low power factor, and selecting the most suitable tariff based on their current usage or load type. We raise awareness about risks and legal implications of unauthorized practices, promoting safe and compliant electrical usage.

Solar Advisory & Utility Liaison Support

We guide consumers through the growing field of solar and renewable energy by providing clear advice on system types, billing methods, expected savings, and applicable government schemes. Alongside this, we assist with load sanction, new service connections, and other consumer facilitation processes provided by utilities—ensuring a smooth and compliant experience from start to finish.

Products

APFC Panel

APFC (Automatic Power Factor Correction) panels improve power factor to near unity, reducing reactive and apparent power demand, cutting energy costs by avoiding penalties for low power factor and maximum demand. They ensure consistent correction even under fluctuating loads, with automatic capacitor switching, load monitoring, and advanced controls. APFC panels enhance power quality, minimize harmonic disruptions, and offer reliable, durable, and user-friendly performance.

Customise 3-Phase Motor Winding

We provide customized winding design solutions for 3-phase induction motors, specifically tailored for textile industries and power looms. Our designs are engineered to deliver optimal torque, speed. We conduct power parameter assessments at your location to design windings that are efficient, reliable, and well-adapted to local voltage conditions and power quality—ensuring enhanced performance and energy savings.

Modern DC Starter for Power loom

DC contactor starters provide efficient DC current control, high reliability, and operation with minimal control current requirements. They are highly suitable for power looms and ensure enhanced human safety while handling 3-phase power. These starters offer quiet performance, long service life, low maintenance needs, and installation included in our service. They feature auto power cut when supply is off, helping protect equipment and personnel across various applications.

Advance Control Panel and Automation

We provide customized power distribution panels for industrial and textile applications, designed for safe and efficient power management. Our panels feature modern automation, logical control circuits, and voltage-current monitoring tailored to operational needs. We also design protection systems and earthing schemes to ensure safety, reliability, and compliance, with durable performance for demanding environments.

PROJECT PORTFOLIO

SBN Electrical Technology

Happy Clients

Mr. MAHESH GUNJAL

"Very professional work. My rooftop solar system was installed quickly with full subsidy support. Highly satisfied!"

Mr. MIRZA ZAFAR

"Excellent coordination and timely completion of our 11kV line project. Team is skilled and well-equipped."

Mr. BHUSHAN AHER

"GROWMAX handled everything from design to net metering. Smooth process and clean execution."

Mr. IRFAN AHMED

"Faced a high billing issue, but GROWMAX guided me with proper advice and helped file a complaint to utility. Got relief. Very helpful team!"

Leadership of Experts & Excellent

Law Expert

Mr. SHAKEEL AHMED

L.L.M., L. L. B., B.Sc., B.Ed., D.L.L. & L.W.

Introducing Shakeel Ahmed, not only a Legal Adviser at GROWMAX ENGINEERS but also, proudly, my father. Holding a distinguished educational portfolio including L.L.B, L.L.M, B.Sc., B.Ed., and a Diploma in Labour Laws and Labour Welfare (D.L.L and L.W.), Shakeel Ahmed brings unparalleled expertise to our team. With an impressive 43 years of experience, he not only navigates legal complexities for our ventures but also stands as a testament to integrity and commitment. Welcome to GROWMAX ENGINEERS, where Shakeel Ahmed's legal acumen and paternal influence converge to shape a legacy of excellence spanning over four decades.

Project Head

MAHMOOD AHMED

B.E. (Civil)

Meet Mahmood Ahmed, a driving force at GROWMAX ENGINEERS. Holding a Bachelor's degree in Civil Engineering, Mahmood serves as our experienced Project Head. With an impressive 17 years of experience, his expertise ensures the seamless execution and oversight of diverse projects. Mahmood brings a unique blend of education and hands-on experience, having worked in Mumbai, Delhi, and Muscat with several national and international organizations handling turnovers in the hundreds and thousands of crores. Welcome to the forefront of GROWMAX ENGINEERS, where Mahmood Ahmed's deep knowledge and extensive project leadership elevate our operations to new heights.

Legal Advisor

Adv. AFZAL NAWAZ

L.L.B., B. Com.

Introducing Advocate Afzal Nawaz, the legal luminary shaping the course of GROWMAX ENGINEERS. With a background in legislative law (LLB) and commerce, Afzal Nawaz offers a distinctive perspective to our legal endeavors. Boasting a decade of expertise cultivated in the renowned Bombay High Court, he stands as the pillar of wisdom guiding our legal strategies. Step into the realm of GROWMAX ENGINEERS, where Afzal Nawaz's wealth of 10 years' experience in the Bombay High Court ensures strategic and insightful legal counsel.

Technical Advisor

MOMIN SHAHBAZ

Ph.D. (Electrical)

Introducing Momin Shahbaz, the powerhouse behind GROWMAX ENGINEERS. With a Bachelor's degree in Electrical Engineering, a Master's in Electrical Power Systems, and currently pursuing Ph.D. in Electrical and Electronics Engineering, He stands as our adept Technical Support. Boasting 5 years of invaluable experience in the educational sector. He brings a unique blend of academic prowess and practical insight to our team. Step into the realm of GROWMAX ENGINEERS, where his expertise in electrical engineering transforms technical support into a beacon of innovation and knowledge.

R&D Head

JAMEEL AHMED

B.E. (Chemical)

Introducing Jameel Ahmed, a vital asset at GROWMAX ENGINEERS. Armed with a Bachelor's degree in Chemical Engineering, he leads our Research & Development division. With an impressive 9 years of experience, his expertise lies at the intersection of chemical engineering and technical innovation, ensuring progressive solutions and service excellence. Step into the world of GROWMAX ENGINEERS, where Jameel Ahmed's leadership in R&D drives the pursuit of advanced, efficient, and future-ready engineering solutions.

Account and Finance

ARSHAD AHMED

B. Com.

Meet Arshad Ahmed, the financial maestro at GROWMAX ENGINEERS. Armed with a Bachelor's degree in Commerce, Arshad oversees our accounting and finance operations. With an impressive 22 years of experience, he brings a wealth of financial acumen to our team with his enormous amount of skill and talent. Step into the financial landscape of GROWMAX ENGINEERS, where Arshad Ahmed's extensive experience ensures meticulous financial management and strategic financial planning for our endeavors.
